NSAIDS

(Non-Steroidal Anti-Inflammatory Drugs)

NSAIDS are medications used to relieve pain and reduce inflammation. They do not cause bleeding, but do affect the ability of your blood to clot or seal. The most commonly used NSAIDS are listed below:

Advil

Aleve

Aspirin

Bextra

Celebrex

Daypro

Ecotrin

Excedrin

Feldene

Ibuprofen

Indocin

Lodine

Motrin

Naprosyn

Naproxen

Orudis

Relafen

Tolectin

- ***Tylenol and Acetaminophen are safe to use ****
