# NSAIDS

## (Non-Steroidal Anti-Inflammatory Drugs)

---

**NSAIDS** are medications used to relieve pain and reduce inflammation. They do not cause bleeding, but do affect the ability of your blood to clot or seal. The most commonly used NSAIDS are listed below:

Advil	Ecotrin	Motrin
Aleve	Excedrin	Naprosyn
Aspirin	Feldene	Naproxen
Bextra	Ibuprofen	Orudis
Celebrex	Indocin	Relafen
Daypro	Lodine	Tolectin

- ***Tylenol and Acetaminophen are safe to use \****
