Agile Patency Capsule Consent

I authorize the provider selected below and the assistant(s) selected by the provider to perform the following: Agile Patency Capsule Study.

- Ravi Mallavarapu, MD
- Srinivas Kalala, MD
- Moaz Sial, MD
- Barbara Burkle, ARNP
- Tracy Elliott, ARNP
- Kelli DeSerano, ARNP

Lay Terminology: Agile Patency Capsule Study helps us evaluate if you are able to have a Capsule Endoscopy. It is performed by swallowing a small disposable capsule. After 30 hours, an X-ray will be obtained to see if the capsule cleared the small intestine. Depending on the results, your provider may order a Capsule Endoscopy.

I understand that there are risks associated with any endoscopic examination, such as bowel obstruction. I understand that a bowel obstruction may require immediate surgery.

My provider has explained the procedure and its risks to me, along with alternatives of diagnosis and treatment, and I have been allowed to ask questions concerning the planned examination.
